

**Behavior Management of Foster Children  
Pre/Post Assessment KEY**

1. When children are early school age (5-7-years-old) and have developed normally, they do which one of the following?  
A. Master walking and talking.  
B. Begin to evaluate self.  
C. Begin to practice driving.  
**D. Begin to take on values and standards of the family.**
2. Children that are in an out-of-home placement due to abuse in their homes almost always develop at the normal rate of their peers.  
T F
3. Discipline must be kept simple and based on the child's developmental level in order for the child to be successful.  
T F
4. Which one of the following is not a basic type of discipline?  
**A. Behavioral Modeling**  
B. Behavioral Contracting  
C. Natural Consequences  
D. Logical Consequences
5. Suzy is a 4-year-old that was removed from her mother's home because the mother's boyfriend had sexually molested Suzy on 3 occasions. Suzy's mother refused to keep the boyfriend away from Suzy. Now, Suzy is getting into trouble for hitting other children in the foster home several times a day and her foster parents want suggestions on how to discipline Suzy. Which one of the following would you suggest?  
A. Draw up a contract defining the behaviors that Suzy should not do, the punishment she will receive if she behaves inappropriately, and have her sign it.  
B. Hit Suzy every time she hits someone.  
**C. Start a behavior chart for Suzy emphasizing the reward Suzy will get if she goes the whole day without hitting anyone.**  
D. Tell Suzie that if she does not stop hitting she will have to go live somewhere else.
6. Which one of the following is correct? Caregivers should not use natural consequences as a discipline when:  
A. The consequences are too far into the future for the child to make the connection.  
B. The child may be harmed or injured.  
C. The consequences may affect other's behavior.  
**D. All of the above.**
