

<b>Child's Name:</b> Tamela Boyers		<b>DOB:</b>	06/29/2001		
<b>Caregiver(s):</b>	Ernest Boyers Esther Boyers	<b>Gender:</b>	Female		
		<b>Form Status:</b>	Initial	Subsequent	Discharge
		<b>Case Name:</b>	BOYERS ~ E		
		<b>Case Number:</b>	22408523		
<b>Assessor:</b>	Super One	<b>Assessment Creation:</b>	07/25/2018		

### ACTION LEVELS FOR "NEED" ITEMS

#### 0 - No Evidence of Need -

*This rating indicates that there is no reason to believe that a particular need exists. Based on current assessment information there is no reason to assume this is a need. For example, "does Johnny smoke weed?" He says he doesn't, his mother says he doesn't, no one else has expressed any concern – does this mean Johnny is not smoking weed? NO, but we have no reason to believe that he does and we would certainly not refer him to programming for substance related problems.*

#### 1 - Watchful Waiting/Prevention -

*This level of rating indicates that you need to keep an eye on this area or think about putting in place some preventive actions to make sure things do not get worse (e.g. a child/youth who has been suicidal in the past). We know that the best predictor of future behaviour is past behaviour, and that such behaviour may recur under stress, so we would want to keep an eye on it from a preventive point of view.*

#### 2 - Action Needed -

*This level of rating implies that something must be done to address the identified need. The need is sufficiently problematic, that it is interfering in the child/youth's or family's life in a notable way.*

#### 3 - Immediate/Intensive Action Needed -

*This level rating indicates a need that requires immediate or intensive effort to address. Dangerous or disabling levels of needs are rated with this level. A child/youth who is not attending school at all or an acutely suicidal youth would be rated with a "3" on the relevant need.*

### ACTION LEVELS OF "STRENGTHS" ITEMS

#### 0 - Centerpiece Strength -

*This rating indicates a domain where strengths exist that can be used as a centerpiece for a strength-based plan. In other words, the strength-based plan can be organized around a specific strength in this area.*

#### 1 - Useful Strength -

*This rating indicates a domain where strengths exist and can be included in a strength-based plan but not as a centerpiece of the plan.*

#### 2 - Identified Strength -

*This rating indicates a domain where strengths have been identified but that they require significant strength building efforts before they can be effectively utilized in a strength-based plan.*

#### 3 - No Strength Identified -

*This rating indicates a domain in which efforts are needed in order to identify potential strengths for strength building efforts.*

### ACTION LEVELS OF "TRAUMA CHARACTERISTICS" ITEMS

*These ratings are made based on the LIFETIME exposure to Trauma or adverse childhood experiences. For this domain, the following categories and action levels are used*

**N (No) - No Evidence of Trauma**

**Y (Yes) - Evidence of Trauma**

**S (Suspected) - Suspicion of Trauma**

## CHILD STRENGTHS

### 2 Family--Nuclear

### 1 Family--Extended

*Comment:* The maternal grandmother is actively involved and serves as a provisional placement.

### 2 Interpersonal

*Comment:* Tamela has limited interpersonal skills
