

All Stars in Arkansas: Training

All Stars in Arkansas: Character Education

The All Stars Character Education training prepares you to deliver our prevention program for 4th and/or 5th graders with ease, confidence and positive results! The training course is available online and includes **three training modules that take approximately four hours** to complete. This self-paced course allows you to “stop and go” as your schedule allows. Completing all **five training modules** while having **access to the course for two weeks** and earning a satisfactory grade on the training assessment at the end of the course will earn you certification as an All Stars Character Education teacher!

All Stars in Arkansas: Core

The All Stars Core training prepares you to deliver our first-year middle school program. It’s step-by-step instruction, in-depth insights and wealth of supplemental resources makes this training invaluable to anyone working with middle school students! This self-paced online course includes **five training modules** and allows you to “stop and go” while having **access to the course for six weeks**. Watch all five modules (total of **8 hours**) and successfully complete assessments along the way and you will be certified as an All Stars Core teacher!

All Stars in Arkansas: Senior

All Stars Senior consists of 6 online modules that take up to 90-minutes for students to complete independently, as well as two 45-minute in person classroom sessions to introduce and conclude the material. While there is no training associated with All Stars in Arkansas: Senior, we will provide you with access to the teacher materials and a demo of the student sessions to familiarize yourself with the program.

Training should take place before you plan to implement the program! If you’re interested in piloting in Summer 2025, Fall 2025, or Winter/Spring 2026, please reach out and we can work with you to develop a training plan!

Interested? Please fill out the training request form by scanning the QR code.
